

## ABSTRACT

Arifah, Lia Zannuba. 2022. *Students' and Teachers' Perception on Using Microsoft Teams Application as English Learning Media*. Undergraduate Thesis. S1 English Education Study Program. Faculty of Teacher Training and Education. Nahdlatul Ulama University Surabaya.

The purpose of this study was to describe the use of Microsoft Teams application in learning English and to analyze the perceptions of students and teachers about Microsoft Teams as a medium for learning English. In the type and design of the research, the researcher uses a qualitative descriptive method to analyze the data. Data was collected by means of observation, documentation of student voice recordings, and interviews at Kyai Hasyim Junior High School Surabaya. The results of this research analysis students are involved and interested in using Microsoft Teams in the English learning process. Microsoft Teams technology can still be used to improve students' English skills.
