

ABSTRACT

Qodariah, Lailatul. 2022. *The Effect of Linguamarina YouTube Channel in Students's English Listening Comprehension*. Undergraduate Thesis. S1 English Education Study Program Faculty of Teaching Training and Education. Nahdlatul Ulama University of Surabaya.

The research focus on students' English listening comprehension through Linguamarina YouTube Channel. Collecting data using tests (pre-test and post-test) and questionnaire. The test results show Asymp.Sig. (2 tailed) is $0.000 < 0.05$ which means there is a significant difference between students' listening comprehension using the Linguamarina YouTube channel. These results are in line with research conducted by (Chien, Huang, and Huang 2020) that application of audio-visual media such as YouTube videos can improve listening comprehension. The application of audio-visual media can also attract students' interest, and motivate students in English learning.

Keywords : English, Listening comprehension, Linguamarina YouTube Channel
